git add

```
factory git: (master) nano test.rb
   factory git: (master) x git status
On branch master
Your branch is up-to-date with 'origin/master'.
Untracked files:
  (use "git add <file>..." to include in what will be committed)
nothing added to commit but untracked files present (use "git add" to track)
   factory git: (master) x git add test.rb
   factory git: (master) x git status
On branch master
Your branch is up-to-date with 'origin/master'.
Changes to be committed:
  (use "git reset HEAD <file>..." to unstage)
        new file: test.rb
   factory git: (master) x
```

git commit

```
factory git: (master) x git status
On branch master
Your branch is up-to-date with 'origin/master'.
Changes to be committed:
  (use "git reset HEAD <file>..." to unstage)
        new file: test.rb
  factory git:(master) x git commit -m "Imprime feature 1"
[master ffd4bbe] Imprime feature 1
 1 file changed, 1 insertion(+)
 create mode 100644 test.rb
   factory git: (master)
```

git push

```
factory git: (master) git status
On branch master
Your branch is ahead of 'origin/master' by 1 commit.
  (use "git push" to publish your local commits)
nothing to commit, working directory clean
→ factory git:(master) git push origin master

Estado de Company

Ejercicio

- Dividirse en dos equipos: **factory** y **company**
- Crear la versión 1.2 en factory
 - Agregar sus nombres a test.rb en un branch distinto al master
- Crear la versión 1.1 en company
 - Agregar sus nombres a test.rb en un branch distinto al master
- Actualizar company con lo que tiene factory (version 1.2)
- Actualizar **factory** con lo que tiene **company**.

Add Company remote to Factory

```
→ factory git:(master) git remote -v
origin https://github.com/vanecan/factory.git (fetch)
origin https://github.com/vanecan/factory.git (push)
→ factory git:(master) git remote add company https://github.com/vanecan/company.git
→ factory git:(master) git remote -v
company https://github.com/vanecan/company.git (fetch)
company https://github.com/vanecan/company.git (push)
origin https://github.com/vanecan/factory.git (fetch)
origin https://github.com/vanecan/factory.git (push)
→ factory git:(master) ■
```

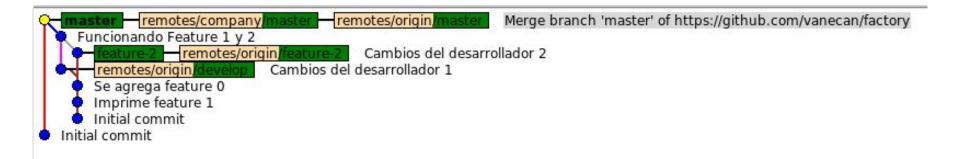

Fetch Company Master

```
→ factory git:(master) git fetch company master
